

Task 2 - Quiz App

Project Title

Quiz App

Project Description

The Quiz App is an interactive web application developed using HTML, CSS, and JavaScript. It allows users to answer multiple-choice questions, calculates the score automatically, and displays the final result upon completion. The application features a clean, responsive user interface and provides a restart option so users can attempt the quiz multiple times.

Objectives

- Develop an interactive quiz application.
- Implement dynamic question navigation using JavaScript.
- Calculate and display the user's score automatically.
- Create a responsive and user-friendly interface.

Technologies Used

- HTML5
- CSS3
- JavaScript (ES6)

Features

- Interactive multiple-choice quiz.
- Automatic score calculation.
- Instant result display.
- Restart quiz functionality.
- Responsive design for desktop and mobile devices.
- Clean and user-friendly interface.

Project Files

- index.html
- style.css
- script.js

Project Outcome

The Quiz App successfully demonstrates the use of HTML, CSS, and JavaScript to build an interactive web application. It provides users with an engaging quiz experience, calculates scores accurately, and offers a responsive design that works across different devices.

Conclusion

This project enhanced my understanding of front-end web development concepts such as DOM manipulation, event handling, responsive design, and JavaScript programming. It strengthened my ability to create interactive and user-friendly web applications.
